IMPORTANT NOTES FOR ALL BIDDERS

We would expect that the wise buyer will submit numerous bids, all at levels commensurate with his idea of the value of each lot. On items that he really wants badly, the serious bidder will bid well above the top estimate, recognizing that his bid will be reduced to 10% above the second highest bid, but also realizing that he may be in competition with other seriously interested bidders.

In those sections which show a price range for an estimate, the low figure represents a wholesale evaluation, while the high figure indicates what a serious specialist would gladly pay for the lot. Bids less than the lower of the two figures will most likely be unsuccessful; bids above the higher figure will most likely be successful and will most likely be reduced as outlined above (see also paragraph 2 of TERMS OF SALE).

In those sections where only one estimate is given, in some instances with a plus mark, these estimates represent what we believe to be a fair wholesale price and/or the reserve. In many cases these single estimates represent our own cost value. In nearly all cases, bids below these estimates will not be accepted. Generally speaking, our estimates should serve as useful guides, but all bidders should use their own knowledge and experience as the final tools to determine their bids.

We make the following suggestions to all bidders:

- (1) Bid what you wish on each item, but keep the estimate and reserve prices in mind lest you waste your opportunity to acquire an item you particularly desire.
- (2) Bid the maximum bid you would pay for the lot, recognizing that if your bid is high, relative to other bids, your bid will be reduced in accordance with paragraph 2 of TERMS OF SALE.

At the conclusion of the listing of all lots we have observed that many of our estimates in the paper money section as well as the gold section, may be considered low and are expected to realize prices at above our estimates. We make this observation based on the increased interest in paper money and the ever-increasing interest in gold. So also, all rare numismatic items are finally being recognized as such and are finding their ranks in value.

Requests for additional information, confirmation of the grade, date, mint mark, etc., of any particular items, or any similar individual questions are welcome and will be answered as promptly as possible.

An asterisk (*) before the lot number indicates that the actual lot offered for sale is photographed and can be found in the PLATE SECTION.

TERMS OF SALE

1. This is a mail bid sale. All mail bids must be **received** at our place of business not later than 6:00 p.m. Central Daylight Time, Dec. 14, 1979. The highest mail bid for each lot will buy it. The highest mail bid on each lot may be reduced to just above the second highest mail bid (see item 2). On this basis it should be obvious that mail bidders should bid generously, if they are desirous of obtaining any particular lot or lots.

2. Terms of reduction: (a) No reduction will apply to bids of \$10.00 or less. (b) On bids of \$10.01 and up, the highest bid will be reduced to 10% over the second highest bid. For example, if your bid on Lot #100 is \$70.00 and the second highest bid is \$50.00, you will obtain the lot for \$55.00 (or \$50.00 + 10%). However, if your bid is \$70.00 and the second highest bid is \$65.00 then no reduction will apply as 10% over the second highest bid will be \$71.50. When reductions apply, amounts will be rounded off to the nearest half dollar.

3. An estimate is given for most lots. These estimates simply represent the owner's idea of the value of the item or our professional opinion as to what each lot is worth. **THEY ARE ONLY ESTIMATES AND YOU CAN BID HIGHER OR LOWER AT YOUR DISCRETION.** To further clarify this, please read the "Notes to Bidders". We recommend that if you seriously want a lot, you should bid close to or over the estimate given herein.

4. All bids are to be made by LOT NUMBER as listed in this catalog. (Please make sure that your bids are legible.) Bids should be made only in United States Funds. In case of tie bids, preference will be given to the bid with the earliest postmark.

5. Lots will be sent on open account only to customers who have established credit with us. New accounts must furnish satisfactory credit references and/or include a 20% deposit. New accounts requesting shipment to a post office box or to general delivery must also furnish their home or business address. Bidders who have not established credit with us will be invoiced for their successful bids; lots will be sent upon receipt of payment.

6. All successful bids must be honored in U. S. funds immediately upon receipt of the lots or the invoice. This is absolutely necessary so that consignors can be reimbursed. Special arrangements for payment are possible if the amount involved warrants such treatment. If this is necessary, please request it BEFORE the auction, not after.

7. BankAmericard, Mastercharge, or American Express may be used to pay for successful bids provided the purchaser agrees to pay the service charge billed to us by our bank on such transactions (3% on BankAmericard, 4% on Mastercharge, and 5% on American Express. Foreign bidders should make payment by International Bank or Postal Money Orders or drafts payable in New York. Bidders making payment by bank drafts drawn on a foreign bank, please add U.S.\$3.00 as this is the minimum bank service charge charged to our account.

8. Postage and insurance or registration fees will be added to all invoices. Foreign bidders will be charged 1% of the total value to partially cover insurance fees, and our insurer will be responsible for any losses. Foreign bidders should advise if special shipping instructions are necessary.

9. 5% sales tax will be added to all lots mailed to Texas addresses, except dealers.

10. Auction sales ARE NOT approval sales. Upon submitting bids you agree to abide by the "Terms of Sale". Experts have described all lots; any errors made by them will be gladly corrected. Likewise, you are responsible for any errors you make. Returns can only be made with our written approval; request for such must be made within ten (10) days of dispatch of lots by us.

11. Title to all lots will remain with the cataloguer until payment in full is received. All items are guaranteed to be authentic (unless otherwise indicated) and to be as listed. Furthermore, the cataloguer reserves the right to accept or reject any or all bids at his discretion.

12. All lots in this auction will be available for inspection by appointment only prior to Dec. 7, 1979.

1. Este es un remate por correo. Todas las apuestas (o pujas) tendrán que ser recibidas en nuestro lugar de negocio no después de las 6:00 p.m. hora de San Antonio, Texas, del día 14 de diciembre 1979. La apuesta más alta para cada lote es la que comprará dicho lote. La apuesta más alta podrá ser reducida hasta el punto de ser un poco más que la segunda apuesta más alta (ver artículo 2). Sobre estas bases, es obvio que los compradores deberán hacer apuestas generosas, si están deseosos de obtener cualquiera de los lotes en particular.

2. Términos de reducción: (a) No se aplicará ninguna reducción en apuestas de \$10.00 ó menos. (b) Sobre las apuestas de \$10.01 en adelante, la más alta será reducida hasta el 10% sobre la segunda apuesta más alta. Por ejemplo, si su apuesta en el lote #100 es de \$70.00 y la segunda más alta es de \$50.00, usted obtendrá el lote por \$55.00 (o sea \$50.00 + 10%). Sin embargo, si su apuesta es de \$70.00 y la segunda más alta es de \$65.00, entonces ninguna reducción será aplicada, ya que si añadimos el 10% a la segunda apuesta más alta, el lote llegaría a costar \$71.50. Cuando las reducciones sean aplicables, la cantidad será redondeada al próximo medio dólar.

3. Se ha estimado un precio para la mayoría de los lotes. Estos precios estimados simplemente representan la idea que el dueño tiene sobre el valor del artículo, ó nuestra opinión profesional de valor del lote. ACLARAMOS QUE SON SOLAMENTE PRECIOS ESTIMADOS Y QUE USTED PUEDE APOSTAR MAS ALTO O MAS BAJO SEGUN SU PROPIO CRITERIO. Para aclarar este punto, por favor lea los precedentes artículos. Recomendamos que si usted está seriamente interesado en un lote, lo mejor será que apueste cerca ó más del precio estimado en este catálogo.

4. Todas las apuestas indicarán el número del lote como aparecen en este catálogo. (Por favor, cerciôrese que sus apuestas sean legibles.) Apuestas serán hechas sólo en dólares Estado Unidenses. En caso de empate en una apuesta, preferencia se le dará a la apuesta que es recibida primero.

5. Los lotes serán enviados a crédito solamente a clientes que tienen crédito establecido con nosotros. Nuevas cuentas tendrán que proveer referencias de crédito satisfactorias y preferible 20% de depósito. Cuentas nuevas que soliciten los envíos a Casillas Postales, deberán proveer también sus direcciones domiciliarias o de su negocio. A los compradores que no han establecido crédito con nosotros se les enviará la factura correspondiente por lotes que han ganado y se les enviará la mercadería al recibir el pago.

6. Todas las apuestas ganadoras tendrán que ser pagadas por medio de giro o cheque pagable en los Estados Unidos o en efectivo inmediatamente al recibir los lotes o factura. Acuerdos especiales para hacer pagos son posibles si la cantidad apostada merece tal trato. Si esto es necesario, por favor, pídale ANTES de que se cierre la subasta, no después.

7. Tarjetas de crédito; BankAmericard, Mastercharge o American Express, se pueden usar para hacer pagos, pero el apostador tiene que pagar el servicio de cargos facturados a nosotros por esas compañías en tales transacciones (3% en BankAmericard, 4% en Master-Charge y 5% en American Express). Nuestros clientes fuera de los Estados Unidos además pueden pagar por giros internacionales de bancos ú otra forma previa y mutuamente acordada antes de cerrar la subasta.

8. Cargos de seguro o certificación de los envíos se le agregarán a todas las facturas. Apostadores deben de indicarnos si existen instrucciones especiales de despacho. Apostadores fuera de los Estados Unidos pagarán el cargo de 1% del valor total para cubrir parcialmente los gastos de seguro y nuestra compañía de seguros sea responsable por cualquier perdida.

9. No es aplicable a nuestros clientes en el extranjero.

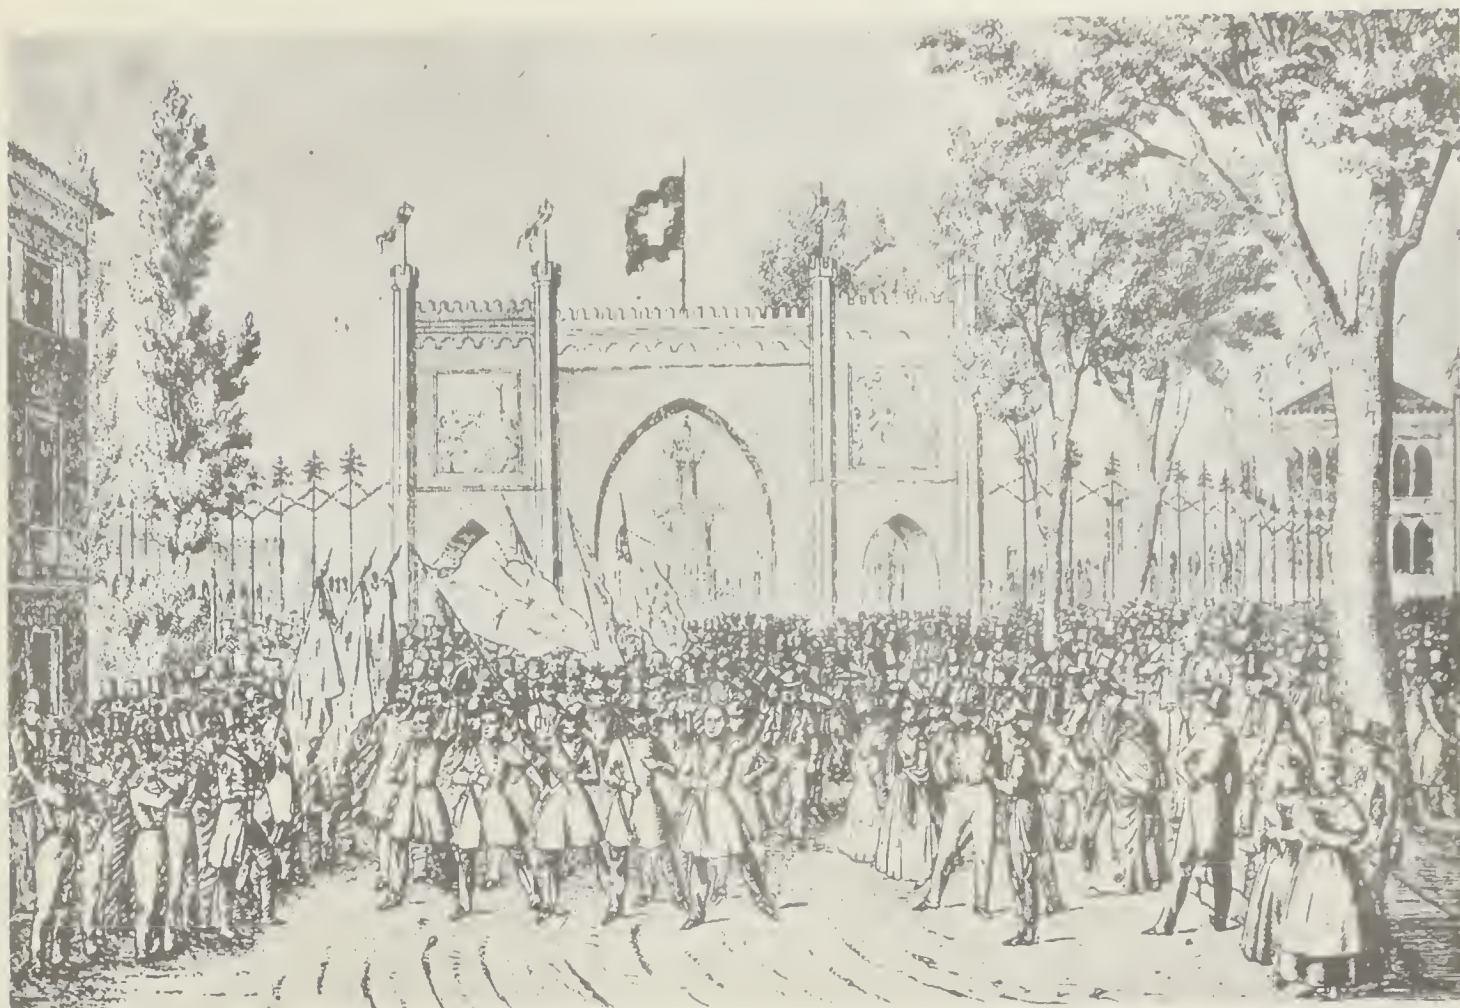

10. Las ventas en los remates no son ventas aprobadas por el cliente cuando él recibe la mercadería, sino que cuando el cliente somete su apuesta, él entra en un acuerdo para comprar la mercadería. Cuando el cliente apuesta, él indica que está de acuerdo con los términos de venta de este remate. Todos los lotes han sido descritos por expertos en la materia; si algún error ha sido cometido por ellos, nosotros estaremos complacidos en corregirlo. En igual forma, usted se hace responsable de cualquier error cometido por su

(Continuación Pag.99)

AUKTIONS-BEDINGUNGEN

1. Dies ist eine Versandauktion. Alle Gebote müssen uns bei Auktionschluss, 14. Dezember 1979 - 18:00 Uhr Ortszeit erreicht haben. Das jeweilige Los wird dem am höchsten Bietenden zugeschlagen. Das Höchstgebot für ein Los kann auf einen niedrigeren Betrag herabgesetzt werden (siehe 2. Absatz). Es dürfte einleuchtend sein, daß auf diese Weise der Bietende ein großzügiges Gebot macht, wenn er den (die) gewünschten Posten bekommen möchte.
2. Bedingungen zum Preisnachlaß: (a) Kein Preisnachlaß erfolgt an Geboten von \$10.00 und darunter. (b) An Geboten \$10.01 & höher - das Höchstgebot wird auf 10% über dem 2. höchsten Gebot herabgesetzt; z.B. wenn Sie für Los #100 \$70.00 bieten und das 2. höchste Gebot \$50.00 beträgt, so werden Sie das Los für \$55.00 (oder \$50.00 + 10%) erhalten. Jedoch, wenn Sie \$70.00 bieten und das 2. höchste Gebot \$65.00 beträgt wird kein Nachlaß gewährt, da 10% über dem 2. Gebot \$71.50 ist. Wenn Nachlaß gewährt wird, wird der Betrag zum nächsten halben Dollar aufgerundet.
3. Ein Voranschlag ist für die meisten Posten gegeben. Diese Voranschläge bezeichnen einfach den vom Eigentümer eingeschätzten Wert, oder unsere berufsmäßige Ansicht über den Wert des jeweiligen Postens. Dies sind nur Vorschläge & Sie können höher oder niedriger bieten, ganz nach Ihrem Belieben. Um es besser zu (er)klären, lesen Sie bitte "Anmerkungen für Gebote". Wir empfehlen, wenn Sie den Posten wirklich möchten, sollten Sie dicht an den Voranschlag oder darüber bieten.
4. Alle Gebote sollen nach den Posten - nummern, wie im Katalog verzeichnet, gemacht werden. (Bitte vergewissern Sie sich, daß Ihre Gebote leserlich sind.) Gebote sollten nur in U.S. Währung gemacht werden. Im Falle eines gleichen Angebotes bestimmt der Poststempel.
5. Posten werden mit einer offenstehenden Rechnung an Kunden, die einen guten Kredit mit uns haben versandt. Neue Kunden müssen ausreichende Kreditempfehlungen haben oder und einschließlich 20% Anzahlung machen. Neue Kunden, die Versandt an eine Schließfachadresse wünschen müssen auch Ihre Heimat- oder Büroadresse angeben. Kunden, die noch keinen Kredit bei uns eingerichtet haben, bekommen eine Warenrechnung für Ihre erfolgreichen Gebote zugesandt. Die Posten werden nach Erhalt der Zahlung versandt.
6. Alle erfolgreichen Gebote müssen sofort nach Erhalt in U.S. Währung beglichen werden. Dies ist sehr wichtig, so daß Konsignatoren ausgezahlt werden können. Spezielle Vereinbarungen zur Zahlung sind möglich, wenn der Betrag eine solche Behandlung rechtfertigt. Wenn das notwendig ist, bitte ersuchen Sie darum VOR der Auktion, nicht danach.
7. BankAmericard, MasterCharge oder American Express können zur Zahlung verwendet werden, vorausgesetzt der Kunde ist einverstanden die Servicekosten, die uns unsere Bank bei einem solchen Geschäft verrechnet (3% bei BankAmericard, 4% bei MasterCharge & 5% bei American Express) zu tragen. Ausländische Kunden werden gebeten Ihre Zahlungen durch eine internationale Bank, mit Zahlkarte oder Tratte zahlbar in New York zu begleichen. Kunden die mit einem an eine ausländische Bank gezogenen Wechsel zahlen, möchten bitte US.\$3.00 dazurechnen, da dies die Mindestkosten sind, die uns von unserer Bank verrechnet werden.
8. Porto & Versicherung oder Anmeldegebühren werden bei allen Rechnungen dazugerechnet. Ausländischen Kunden wird 1% vom Gesamtwert verrechnet, um die Versicherungskosten teilweise zu decken und unsere Versicherung wird für etwaige Verluste haftbar sein. Ausländische Kunden sollten uns mitteilen, wenn spezielle Versandtinstruktionen von Nöten sind.
9. 5% Verkaufssteuer wird bei allen Verkäufen an Bewohner des Staates Texas verrechnet, ausgenommen Händler.
10. Auktionsverkäufe sind keine Bestätigungsverkäufe. Bei Einreichung von Geboten erklären Sie sich mit den Verkaufsbestimmungen einverstanden. Die Posten sind von Experten beschrieben, irgend welche Fehler, die Ihnen unterlaufen sind werden gerne berichtet. Gleichfalls ist man für die Fehler, die man macht verantwortlich. Rückgaben können nur mit unserer geschriebenen Bestätigung gemacht werden; Gesuche müssen innerhalb von zehn (10) Tagen, nach versandt der Ware gemacht werden.

ABOUT THE SWISS MEDALS WHICH WE ARE OFFERING IN THIS AUCTION ...

Perhaps there is no other medium more appropriate than that in which the Swiss people have conveyed to the world their competitive spirit by issuing these commemorative medals, truly masterfully engraved and portraying undoubtedly the most beautiful designs ever. For hundreds of years, the "cantons" which are now united, fought against each other; but whenever a foreign power attempted to invade, they stood together, and finally formed a confederation in 1848. However, long before this, medals were being engraved or struck by the different cantons to reward the marksmen.

To complement the beautiful designs, there are medals of all sizes and shapes and of various metal compositions, some in aluminum, some in tin, lead, bronze, white metal, silver and gold. Every medal is a sight to behold, each telling its own story and yet each following the same design patterns, as if to complement each other. So symbolic are these medals of the Swiss culture, that today the national strength relies on every young man over 20 being issued his own army rifle.

Medals are beautifully designed miniature monuments portraying the history of nations. Collect them — you will enjoy them!

LOOK FORWARD TO ADDITIONAL WORLDWIDE MEDALS AS WELL AS SWISS SHOOTING MEDALS IN OUR FUTURE AUCTIONS!

*177	-Buenos Aires listed in J. T. Medina LAS MONEDAS CHILENAS Num. 16 (Plate III, No.1) also Fonrobert Num. 10,060, and Rosa's MEDALLAS Y MONEDAS REPUBLICA ARGENTINA Num.4. A magnificent 16 Reales size (51mm) colonial medal of a high degree of rarity. Obv: portrait of Charles IIII and legend around. Rev: a coastal town with sun above mountains and Iberic lion in foreground holding Spanish flag between his teeth, a sword in his left paw above the hemisphere with a fallen English flag below and legend around as follows: QUISO SER VENCENDOR/YA ESTA VENCENDIDO (he wanted to be the victor/but he is now the loser) and the date DIA XII DE AGOSTO DE MDCCCVI. This medal could be somewhat compared in the dimension of numismatic rarity to that of United States Medina Num. 164 depicting a rampant lion freeing itself from entanglement in resentment to Great Britain. That medal sold by us in our June 30, 1973 Auction realizing \$1,950.00. It is interesting to note that the bust in our specimen is of a more detailed design than that of the medal appearing in Medina's plate including that the 3 stars at 12 o'clock on the obverse are of the same size but in Medina's plate the star in the center is considerably higher. This medal grades about uncirculated, is of a high degree of rarity and bids should exceed 2,000+	2,000-3,000.00

*336	-EMERGENCY ARAUCANIA (Patagonia Area) 50 Centavos (Bolivia 4R 1858) c/s "OA" on Obv. by the French Adventurer Orllie Antoine I the self-proclaimed King of the Araucania in 1874. <i>The Araucania is a former region of Central Chile near the Bio Bio River now belonging to the Concepcion and Cautin Provinces and the home of the Araucanian Indians. Although no former offerings of this coin have been made by Almanzar's Coins of the World, it can be found listed in LA CASA DE MONEDAS DE SANTIAGO DE CHILE 1743-1943 - an elaborate study featuring issues of the Santiago mint and other related numismatic items pertaining to Chilean numismatics. Also, this coin was offered by Freeman Craig in his 30th issue of July 4, 1976. The Craig specimen featured, did not have the "SP" c/s on the Rev. The coin hereby offered should be considered extremely rare. The actual condition is Very Fine and bids should exceed.</i>	500.00+
		
*337	-ARAUCANIA 1 Peso issued by the Adventurer Orllie Antoine I (one of two type coins issued by the King of the Araucania (see lot #336 also). <i>The Araucania is a former region of Central Chile near the Bio Bio river now belonging to the Concepcion and Cautin provinces and the home of the Araucanian Indians. Contrary to the previously listed piece, these are not counterstamps stamped over another coin but rather crudely counterstamped pieces on a 40mm hammered silver disk - no previous offering of this coin has ever been recorded in Fixed-Price-Lists or Auction catalogs. This is also listed and illustrated in the book LA CASA DE MONEDAS DE SANTIAGO DE CHILE 1743-1943. This coin was originally borrowed by us for publishing in Mr. Almanzar's revision of EIGHT REALES, PESOS & DOLLARS OF THE NEW WORLD (now in preparation). And, now the owner has decided to auction it. When this coin becomes more widely known, it will find a very high level of rarity and value as it exceeds in rarity to a Coquimbo, a Valdivia and even a Tarapaca. However, in keeping with the consignors reserve, we expect this coin, which actually grades Extra Fine, to exceed.</i>	2,000.00+

LOT#	DESCRIPTION	ESTIMATE
*422	-CUBA CONT. Pattern set, Moneda Provisional in copper, 10 Centavos, 20 Centavos, Medio Peso, and 1 Peso, very desirable and rare coins. The 10 Centavos Red UNC, 20 Centavos UNC with 50% luster, 1/2 Peso Abt. XF, and 1 Peso AU with minor ding at 3 o'clock should exceed 2,500-3,500.00 <i>We do not want anyone to be mislead into thinking that this is not an extremely rare coin set. This is the same set which we have offered in previous auctions but only because it did not bring the owner's reserve price. We have not seen another similar set offered by anyone in recent years. Further, considering galloping inflation and interest in Cuban coinage, we feel that a bid of the expected minimum \$2,500.00 is extremely reasonable.</i>

*698	-EIGHT REALES AND PESOS E59 8 Reales 1802M, VG plugged or repaired in center	85.00+
<p>*699 -8 Reales 1847A, of the same design as the Central American Federation 8 Reales, but with plain edge and an additional 2mm in size (41mm). This pattern is similar to the 1851/36MA offered in our February 28, 1978 auction (lot #115) which sold for \$3,200.00. That particular pattern appeared to have been struck in copper with silver inlay as is this coin. Reverse completely double struck. This piece is almost as struck except for a blow damaging the "8" of "8 REALES" to the left side of the tree. We expect bids will oscillate between 2,000-3,000.00 <i>It is interesting to note that the 1851 piece which was offered in our February 28, 1978 auction is mentioned in Holland Wallace's CENTRAL AMERICAN COINAGE book - however, the 1847A hereby offered is not mentioned in any catalog which places this coin in the "unique" category being that it is the only one ever reported.</i></p>

*874 -Buttrey 71 1 Peso Pattern 1866, Mexico City, undoubtedly one of the most outstanding and significant Pattern coins of Mexican numismatics. This pattern 1 Peso bears the regular design with the obverse legend in smaller characters and minor differences in the coat-of-arms in the reverse. Proof toned Unc 2,000.00+

There are often stories of somewhat mythical sounding which are alleged about Maximilian coins. It is said about the 20 Pesos gold piece that each member of the Firing squad was presented one of these coins by the Emperor at the time of his execution. It is also said that only 36 patterns of the 1 Peso were struck and that the die mysteriously shattered at this point and that 36 was also the Emperors age when executed.

LOT#	DESCRIPTION	ESTIMATE
*1585	-MEXICO EMERGENCY COINAGE EMX 2 8 Reales 1811RP, Chihuahua, VF quite nice for type . .	175.00+
		
*1586	-EMX-- V181 8 Reales (1811RM), Durango, Nueva Viscaya, this is an extremely rare, seldom offered issue. So rare that since we originally obtained three pieces in the famous Jose Toribio Medina collection (1967), not a single piece has been offered to us until now. When considering that we are always willing to pay competitive prices for coins for our fixed-price-lists and many rare coins are consigned to our auctions, we can establish from the few pieces we have handled that the dimension of rarity of the Nueva Viscaya is quite high. Although this specimen has little wear, it is not fully struck and we are grading FINE, RR	1,000-2,000.00
*1587	-EMX-- V111.2 8 Reales 1813 (cannot decipher assayer's initials) Durango, remains rare FINE	150.00+

LOT# DESCRIPTION

ESTIMATE

- *1615 -REVOLUTIONARY PESOS 1913-1917 EMX 191 1 Peso 1913, Chihuahua, this so-called "Bolita" piece (with the large ball in the center of the reverse) is one of the rarest and sought-after Mexican pieces. If this can be established, a "Bolita" piece turns up in an average of once a year. The offered coin has undoubtedly lived its purpose and was carried and spent by rebel forces as it has definitely been circulated and has minor dings. This VERY FINE specimen. 3,000-3,500.00
This is the same coin offered by us on previous occasions. This coin is the property of our firm and much to our surprise, it has not obtained a high enough bid. We continue to emphasize the rarity of this type (as we have only owned three pieces in 19 years) but, we will part with the coin at a bid which will at least match our cost of \$2,800.00.

- 1616 -EMX192 1 Peso 1915FR, Chihuahua, VF-XF weak areas 50.00+
 1617 -Another as above, except XF 70.00+

1891	-CC14624 2 Reales 1793IJ, Variety with elongated Laurels VG+.	5-10.00
		
*1892	-Pelicer I Bru 880 CC6361 4 Reales 1659V, Lima, so called "Estrella de Lima" (star of Lima type) in our very first auction (August 31, 1970) featuring the Jose Toribia Medina collection and other im- portant consignments, we offered one of these coins under lot #6004. The coin then offered was of lower grade and less design was visible. The coin offered shows the crown above the pillars and the "IIII" of Felipe IV is visible which is not the case in the specimen offered in 1970. The estimate for that parti- cular coin was \$1,000-1,500.00 and it sold for \$850.00. With galloping inflation and increasing numisma- tic interest in this series of coinage, we expect the winning bid to surpass.	2,000.00+
*1893	-CC13022 Lima 4 Reales 1777MJ,	50.00+

WE ENCOURAGE EVERYONE TO BID, BID, BID - USUALLY HIGHER ON THOSE PIECES YOU DESIRE THE MOST. BUT, WE ENCOURAGE WHOLESALE BIDDING FROM EVERYONE ON THE PIECES OF LESSER INTEREST TO THEM. OFTEN BECAUSE THE ATTENTION IS FOCUSED ON CERTAIN ITEMS, THERE ARE TIMES WHEN SOME COINS WILL GO UN-BIDDED OR BIDDED AT BELOW WHOLESALE. WE ARE ALWAYS WILLING TO DEPART WITH COINS AT WHOLESALE PRICES AND OWNERS RESERVES WHICH ARE USUALLY VERY FAVORABLE TO THE COLLECTOR.

THE HARLAN C. NUPEN COLLECTION OF EDWARD VIII COINAGE (INCLUDING OTHER 1936 WORLD COINAGE)

As promised in our previous auction when we featured the Harlan C. Nupen collection of Edward VIII Medals, we are hereby featuring the coinage portion of his collection.

The coins offered in this auction may be classified as follows:

- I. Coinage issued with either the legend or the effigy of Edward VIII.
- II. Coinage dated the year of his reign with the legend or effigy of his predecessor, King George V, but rightfully belonging to the 11-month reign of Edward VIII.
- III. Coinage of nations, other than British Commonwealth, which issued coins in the year of his reign.

When reviewing this collection, it is interesting to note the large percentage of coins which were issued either with the legend or effigy of the King, reminding us of the greatness and influence of the British Empire at the time. The collection of 1936 coins has many interesting factors of numismatic interest. The coins are diversified in sizes and designs, including minor coinage as well as crowns and all types of metals. They are short-lived, 1-year types. With a few exceptions, they are easily obtained - even though the year of issuance was just out of a great World depression which kept their mintage to a medium level and makes the challenge of collecting them still feasible. And lastly, they are "romantic coins", issued during the reign of the Monarch who gave up the throne to marry the woman he loved.

Perhaps one of the most interesting series of coins obtainable by collectors is the 1936 Maundy Set ordered by Edward VIII and distributed by him personally at the Maundy ceremony. There are in all, 13 of Edward VIII type coins issued for circulation in Great Britain, plus a practically unobtainable set of coins was prepared ranging from five Pounds gold to the Farthing. However, these pieces remain in the hands of royalty, museums or big investors. Perhaps the most unusual coin, and one of the most difficult to obtain in the series, is the muled penny of British West Africa (Y21) combining the reverse of East Africa with the reverse of British West Africa. As the consignor was in the habit of purchasing duplicates, bidders will note that there are many cases where more than one of the same coin is offered, and sometimes several of the same coins are grouped to avail the bidder to purchase extra pieces for investment.

Have you really thought of the difficulty of collecting all of the coins issued for a certain year? For example, try to collect the year of your birthday. It will take mailing many want lists, searching through hundreds of catalogs, browsing in many coin shops, etc. Recently a lady came into my store and told me she wanted some coins of the year of her birthday, and among thousands of coins, in a half hour, I was barely able to come up with a dozen or so pieces. I have not asked Mr. Nupen what drove him to collect the 1936 medals and coins. I am sure the satisfaction of conquering as he added each piece to his collection was rewarding enough. But, could this be the year of his birthday? We have never asked him. Or, was it admiration for King Edward VIII, the Monarch, who gave up the throne to marry the woman he loved?

A whole fleet of treasure-laden galleons were lost in the Florida Keys and in recent years divers have been finding their remains and bringing up valuable treasures off them.

The Loss and Salvage of the

1733 TREASURE FLEET

By Jack Haskins
Photos by Bob Marx
& John Berrier

ALMOST EVERY year from the 16th through the mid-18th century Spain sent an Armada to the swampy little town of Vera Cruz. Twice a year this little Mexican coastal fishing community thrived with activity. Once when the yearly Armada arrived and again when it departed. The arriving ships carried mercury for processing the precious metals obtained from the mines. They also carried a variety of luxury items from the old world such as wines, liquors, ironwork, etc. The departing fleet was called the New Spain Flota and was loaded with gold, silver, and other fruits of the land.

Due to the unhealthy climate at Vera Cruz, all of the trading and registry of goods was done in the town of Jalapa, located higher up in the interior. After unloading each arriving Armada, a great Fair was held and the merchants for miles around flocked to it to buy commodities from abroad at exorbitant prices. A similar Fair was held

prior to the departure of each New Spain Flota.

The arriving ships would tie-off on a small rocky fortress called San Juan de Ulua, located out in front of Vera Cruz. The leeward side of this island faced the city and was steep-sided with very deep water right up close to the shore. The ships of the Armada would ride here with their bows tied to great iron rings embedded in the stone fortress, and in this manner it was possible for a person to go aboard the ships by merely stepping onto the bow. The stern of the ship was held off by deploying a large anchor astern. Secured in this fashion, the ships could safely ride out the many storms normal to these waters.

On the 25th of May in 1733, the New Spain Flota for this year, commanded by the Chief of Squadron, Lieutenant General Don Rodrigo de Torres y Morales, left this island fortress for Spain. The fleet was to make a stop at Havana to pick up the Caribbean

Islands' registry and last minute provisions. The Flota was comprised of 17 ships at this point; the three principal ones being the *Capitana El Ruby*, the *Almiranta El Gallo Indiano*, and the *Refuerzo El Infante*. Each of these three warships carried 60 cannons and their combined registry was in the neighborhood of 13,000,000 pesos in gold, silver, and copper. The rest of the ships all carried some amount of registry silver along with other valuable commodities and each carried some armament to aid in fighting off intruders. The Royal Scoutship of His Majesty King Phillip the Fifth carried no registry and was named *Nuestra Senora del Populo*.

Once out on the broad expanse of the Gulf, the ships slowly worked their way north to the 25th parallel, where they took advantage of the Westerly winds at this latitude to push them eastward. The approach of the Florida coast was signalled by the shallowing of the water to 30 fathoms.

At this point, the navigators knew they were off the southwest tip of the Florida Keys in a place called Sonda de Tortuga. From here it was an easy 30 league tack to the south to pick up the Cuban coast and Havana.

Eighteenth century Havana was the center of commerce for the Spanish in the West Indies. Merchants came here from all over the Caribbean provinces to trade and load goods aboard the ships bound for Spain. It was also a sort of sin city or sailor's town, even considering the fact that Spanish seamen were much more religiously motivated than their English or French counterparts. The day prior to departure, the harbor was a hubbub of activity, and the great ships were packed to capacity with last minute registry and provisions. Great quantities of salted meat and biscuits were lowered into the holds and the water casks were all filled to overflowing.

On the morning of the 13th of July, there was a great excitement throughout the city; the Flota was leaving for Spain! A rosy sunrise greeted the ships as they worked their way out of the harbor and past Moro Castle into the open sea, where a fair southeast breeze met them. Don Rodrigo de Torres' flagship *El Ruby*, swathed in new red paint, and with cross emblazoned sails, led the fleet up the Bahama Channel. This swift waterway, known today as the Gulfstream, would give the ships an extra four knots

speed up to the 32nd parallel, where they planned to turn eastward for Spain. However, a fast circulating weather system a few hundred miles to the southeast had other plans for them.

A letter written by the Naval Commissioner, Don Alonso de Herrera Barragan, to the President of the Council of Trade at Cadiz, best describes what happened next. He writes from the Capitana *El Ruby*: "... the 14th we discovered the land of the Keys of Florida. At 9:00 that night the wind began to rise out of the north. It continued to freshen to the point where we all knew a hurricane was imminent. We found ourselves close to the expressed Keys, with the wind and sea so strong we were unable to govern ourselves, and each new gust came upon us with renewed major force. On the 15th, signs were made (among the ships of the fleet) to try and arrive back to the Havana, but we were unable to do so for the wind went around to the south without slacking its force or lessening the seas. By 10:30 that night we had all grounded in the expressed Keys at a distance of 28 leagues in length. This *Capitana* grounded on the one called Cayo Largo, two and one-half leagues from shore. I make assurance to Your Lordship that it was fortunate that we grounded for if the contrary had occurred we would have all drowned because the hold was full of water and we were unable to

pump it out. . . "

One ship of the Flota escaped the storm with little or no damage; the 60 gun warship, *Senor San Joseph*, alias *El Africa*. This newly built ship which joined the Flota at the Havana, managed to weather the storm with only the loss of a top mast, a few spars, and some rigging. After the storm eased up a bit, the *Africa* slid in close to the reefs off of Key Largo, where she anchored to effect repairs to her storm-battered rigging. After settling back on two storm anchors dropped in forty fathoms of water, some of the crew aloft in the rigging spied two wrecked ships inshore. The one was still afloat, but the other was sunk up to the top of its roundhouse or poopdeck. The ships were later determined to be the Adviceship of His Majesty, *Nuestra Senora del Populo*. After gathering what they could from these ships along with their crews, the *Africa* set about to make the necessary repairs in order to continue her journey to Spain. At this point, it is interesting to note that the crews of these ships knew nothing of the fate of the rest of the Flota. They ran across some nomadic Indians who said they had just come up from Key West, but they had seen nothing of the rest of the Flota.

The salvage of the wrecked ships began within a few days after the storm. Three of the ships were refloated with little difficulty: the ship of Murguia (*Nuestra Senora del*

Two divers near ship's cannon, one holding a gold scabbard tip.

Rosario y Santo Domingo), the ship of Sanchez Madrid (*El Gran Poder de Dios*), and a small Balandra bound for St. Augustine under the protection of the convoy (*La Balandra el Santander*). There is a good possibility that the ship of Chavez (*Nuestra Senora del Carmen*) was also refloated, but the documents are contradictory over this point. Two of the ships of the Flota met absolute disaster: the ship of Don Christoval de Urquijo (*San Ignacio*) and the Frigata which was bound for St. Augustine with the payroll for the Presidio. The *San Ignacio* came apart out in front of present-day Marathon, (cayo Vaca del Oeste), and only 12 or 14 of those aboard survived. The Frigata (*El Floridano*) crashed across the reef known today as Coffin's Patch and only one man lived to tell the tale.

It would be extremely difficult to say who was the first of the modern day salvors to find the 1733 wrecks. The local fishermen have been fishing on them for years and have always, understandably, kept the locations to themselves. One of these local fishermen deviated from this practice one day in 1948 and showed Arthur McKee, Jr., the location of a tremendous ballast mound. The Conch fisherman's name was Reggie Roberts and his sons Jack and Earl were out with Art one day when they ran across the pile, right where Reggie had said it was.

After finding the *Capitana*, Art ran across

a map which showed the locations of the 1733 Flota, and he set out to find more by comparing the ancient map with a modern one. He managed to find the *Infante*, *Herrera*, *Chaves*, *San Pedro*, and last but not least the *San Joseph*. But Art was primarily interested in the *Capitana* and so he concentrated on this and reaped the harvest in gold, silver and artifacts. He was so successful that he applied to the State for some protection of his finds and they issued him an exclusive lease covering hundreds of square miles, and they even appointed him the first Acting Underwater Archaeologist for the State of Florida. However, the area was too big to control, and the inevitable happened: others got bit by the treasure hunting bug and followed his footsteps. Since that first day in 1948 when Art revisited the *Capitana* he has been bringing treasure up from it. In fact, he brought up so much treasure that he had to build a museum to house it all. He erected it like a great stone castle. Each year thousands of visitors travel down through the Keys and stop in to view these remnants of 18th century living. The great stonefaces structure stands today on Plantation Key, boldly facing the sea and the *Capitana* which Art dug for so many years.

During and shortly after the Second World War, when iron was scarce and bringing a premium price at the scrap yards, some of the old Miami and Keys' salvors set

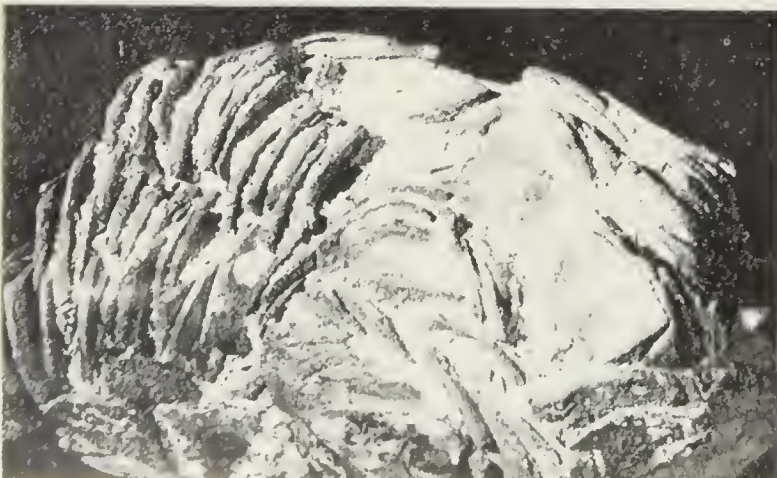

about gathering all the iron cannons they could find. They visited many wrecks, including many of the 1733 Flota and quickly left them, realizing only a pittance for their efforts. Later, more enterprising men followed, equipped with airlifts, hydrojets, and other modern excavation equipment and gathered up the fortunes that the scrappers had rejected in their haste.

The salvage of these rich wrecks has not been without its more tense moments. When Art first found the *Capitana*, claim jumpers plagued him constantly. Most of them were poorly equipped and only a nuisance. However, one group from Miami came down with a big boat and anchored it squarely over Art's wreck. They proceeded to tear into the *Capitana* with eight inch airlifts, spewing sand, stones, and artifacts in all directions. Art managed to drive them off after a confrontation in the water with spearguns and an anti-shark 12 gauge shotgun powerhead. "It was like something out of a scene from 'Thunderball'," Art reflected. But in all the years that modern day treasure hunters have been working these waters no one has actually killed another salvor; something the fishermen of these waters, unfortunately, cannot say.

One of the more interesting wrecks of the 1733 Flota is the *San Joseph y Las Animas*, revisited by Tom Gurr and his associates back in 1968. The resulting notoriety and

Clump of pieces of eight found on a 1733 shipwreck.

Two Divers inspecting an old anchor.

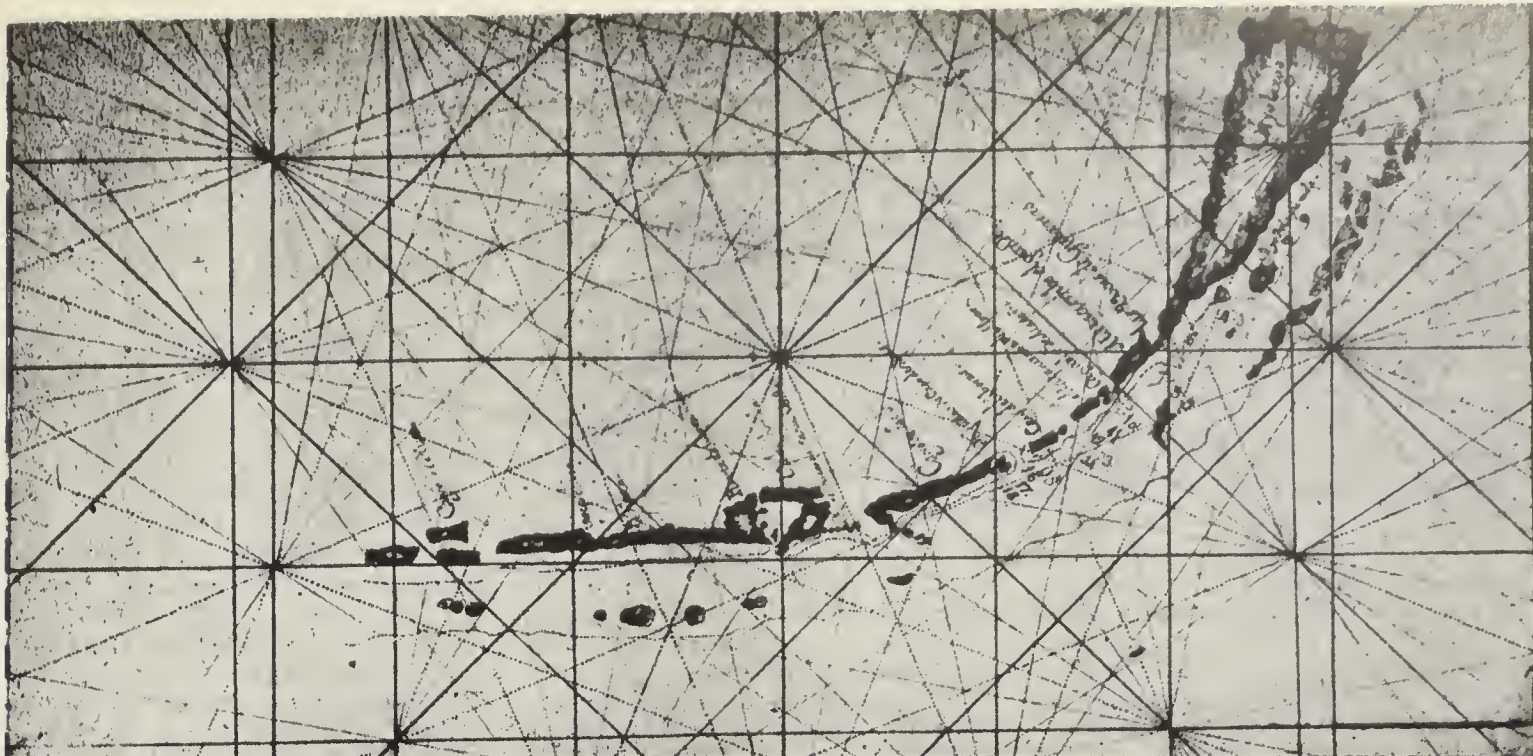

Chart showing the locations of the 1733 wrecks in the Florida Keys.

furor over the treasure they brought up caused Florida Officials to place a moratorium on treasure hunting in the Florida Keys which lasted for over a year. From this point on, all treasure hunters realized that if they were going to work wrecks in Florida waters, they would have to enter into contract with the State.

Other significant finds were made and each brought a flurry of new faces to the Keys. From those early days in 1948 when Art started his modern salvage efforts on the 1733 wrecks, the interest in treasure hunting has spread throughout the Keys. It attracts men from all walks of life, not unlike the old California Gold Rush Days. Each new tale of a rich find would spread through the Keys like wildfire, little resembling its original context by the time it reached maturity. One-by-one the 1733 Flota was being revisited and the rich history within these old ships was being brought to the light of day for all to see and enjoy. The treasure hunter, out of sheer necessity, was scouring not only the sea, but also the world's archives for clues to the ships' locations. Probably the treasure hunter has contributed more to the enlightenment of lovers of sea history than any other group or profession.

To date, most of the 1733 Flota has been revisited by modern salvors; only a few remain untouched. These ships are as follows: the Royal Scoutship *Nuestra Senora del Populo*, the merchantship *San Fernando*, and the rich *Sqn Ignacio*. These last two are located in areas presently under contract with the State of Florida, and concentrated efforts are being made to find them. The *Populo*, no doubt, lies somewhere near Legare anchorage off Elliot Key, in about 25 to 30 feet of water, according to the documents. It would take a lot of Federal pull to get in there and search for her, as this is part of a Federal seapark known as Biscayne National Monument. But it could be worth the effort.

The author had the privilege of being one

of the first to revisit one of this famous Flota back in 1972. This was the merchantman, *Nuestra Senora de Las Angustias*. The remainder of this article will be devoted to the tale of this discovery.

After spending four months at the Archives of the Indies in Sevilla, Spain, and a few other institutions in Madrid during the spring of 1972, I was ready to tackle the 1733 Flota. For the past four I had been searching for the 1622 galleon *Nuestra Senora de Atocha*, but my research finally convinced me that Mel Fisher down in Key West had, in fact, found it about 8 or 9 miles west of the Marquesas Keys. So I decided to concentrate on the 1733 Flota.

The ships which interested me the most were the *San Fernando* and the *San Ignacio*, but unfortunately the area where these ships lay was under contract with competitive salvage groups, and I would have to bide my time with these, hoping the contractors would give up the area (which they eventually did). The next best thing, excluding the *Populo*, which was in an area destined to become a Federal Park, was the merchantship, *Angustias*. A lot of clues told us of her whereabouts, including six different maps drawn by contemporary eighteenth century salvors. It had to lie about midway between Long Key and Conch Key, according to our best calculations.

My business partner for the search was Dick MacAllaster of Marathon, Florida. He flew to Tallahassee and made all of the arrangements with the State Division of Archives, History, and Records Management and secured the necessary Exploration Contract under the name of Peninsular Exploration and Salvage Corporation. The final stage was now set; all we had to do now was find it.

I was going to use my 38' Matthews cabin cruiser to perform the actual search. This 1929 vintage survey vessel was filled with electronic gear; like a surplus U.S. Navy ASQ-3 magnetometer which was used dur-

ing World War II to find German submarines. This device is capable of detecting any iron object at a considerable distance and since most of the old sailing ships are anywhere from 10% to 20% magnetic material, it would prove a good target for the "mag." Most of these ancient ships were put together with iron spikes and rods, carried at least five huge iron anchors, and were adorned with a number of iron cannon for defense. In addition, the ship's rigging and ballast are good magnetic targets. It matters little whether the ship lies out in the open or beneath tons of sand and silt; the "mag" will still see it. It is little wonder that this ingenious electronic device has gained the reputation as the "open sesame" of the treasure hunting world.

While my partner, Dick McAllaster, was up in Orlando visiting his wife's favorite doctor (he was close to becoming a daddy), Jimmy Jones and I started up the survey operation. We had my boat docked at the Toll Gate Inn on Lower Maticumbe, which is about 15 miles to the northeast of our search area. We had spent the past week getting the boat and equipment ready for the job and on the morning of 21 September, we set off down the Hawks Channel for Long Key Viaduct. About half way there the ship's engine started acting up. I flung open the engine hatch and groaned at the sight of a water pump squirting salt spray all over the V-6 Buick unit. We could always juryrig a Jabsco 12-volt electric pump and limp home, but we were determined to do or die that day. It took us about an hour of cussin' and sweatin' to fix the unruly brass fixture, but we did it, and once more the R/V Trident's bow was slicing water toward the swift current of Long Key Channel.

It was a beautiful day with just a light chop on the water and with crystal clear seas; ideal "magging" weather. We reached our area at about 11:00 and we spent the next half hour carefully studying the grid lines I had constructed on an 851 series

The author inspecting a gold coin he recovered off a 1733 wreck.

Coast and Geodetic Chart. The plan was to start at about the middle of the area of prime suspect and expand the survey on all sides. We took careful bearings on the bridge and maneuvered to the point we had marked as the center. Jimmy worked his way out onto the bow of the boat, which was piled high with brightly colored spar buoys. As I directed the R/V Trident along the initial grid, he methodically flipped the buoys over the side at regularly-spaced intervals until we had made up a grid path 400 yards long. We then turned to seaward and proceeded to put the magnetometer tow head or "fish" into the water. This was, in itself a task, for the head weighs over 200 pounds and if a sea of any size is running, the operation becomes tricky. Fortunately for us, this day the seas were running less than one foot. As Jimmy eased the boat into gear, I played the cable astern until the "fish" trailed us by about 100 feet. Next the drop buoy was run out. This float/weight combination is designed

to ride on top of the water just aft of the towing head. When an anomaly of any significance is detected, the line is released and the weight falls into position very close to the "hit" and the buoy remains atop the water to guide the boat crew back.

Jimmy lined the boat up for our first run along the grid lines, and I made sure the magnetometer was well tuned up and running steady. I told him to make the first pass about 15 feet off the spar buoys. Ahead the fluorescent colored spar buoys bobbed gently on the surface in nearly perfect alignment. The mag head trailed smoothly behind the boat, lurking beneath the sea like some great white fish. It was riding about five feet off the bottom and was controlled at the helm by means of a fathometer located in front of the helmsman. It slid quietly past the first colored spar buoy. Inside, I watched the paper roll off the mag recorder. The resulting inked line was steady; indicating the normal behavior of an area void of

magnetic material. I marked the paper to signify the end of the first run just as the head flashed past the last spar buoy. Jimmy continued the run for another hundred yards then put the helm over to start a slow turn back toward the grid line. This time we would run to seaward on the other side of the spar buoys.

The bridge was getting fairly close and the recorder needle began an erratic wander. At first I attributed it to the turn, but when I saw that it was persistent, I immediately became suspicious of junk iron thrown off the bridge by its builders years ago. I put it out of my mind as we lined up for the next pass. The next two runs were without incident, other than the persistent "tickles" I would get when closing with the bridge. On the turn for the fourth run, however, I noticed the recorder out of the corner of my eye. We were on our brideward turn again and this time, instead of "tickles," the needle swung rapidly to the right and stayed there. I released the buoy instinctively. I had to take a look at this junk, no matter what it was. Jimmy pulled the boat up to the bobbing orange drop buoy float, and I slipped over the side and into the water. At first all I could see was an array of purple sea fans and big black basket sponges, then I noticed an object that nature had not put there. It was a clump of Spanish firebricks of the type I had often noticed on some of the 1733 wrecks. Then I spotted some scattered ballast rocks and an occasional iron fitting. I scrambled back toward the boat and climbed aboard.

In the meantime, Jimmy had been doing a little looking around from the top of the cabin. "Let's hurry up and pull the anchor," he said with a funny look in his eyes,

NOTICE OF THE SITES WHERE THE SHIPS OF THE FLOTA GROUNDED AT A DISTANCE OF 28 LEGUAS FROM THE HEAD OF THE MARTIRES TO THE KEY OF THE VACAS

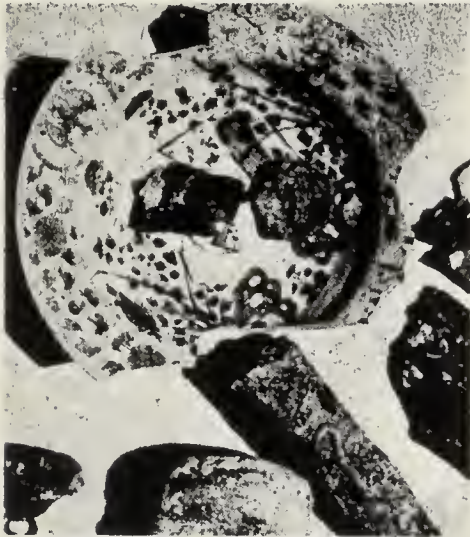

Pinque Populo	At the head of the Martires, flooded up to its poopdeck
El Aviso	Off Cayo Viscayno, remaining afloat
San Joseph y Las Animas	Cayo de Tavanos and Boca de Guerrero, flooded up to its poopdeck
Infante	Cayo de Tavanos and Boca de Guerrero, its decks flooded
Capitana	At the same place, totally flooded
Chaves	Matacumbe El Grande, free of its cargo
Herrera	Same place, its decks flooded
Tres Puentes	Same place, totally flooded

Balandrita	Same place, remaining afloat
Rosario of Murguia	Cayuelo de Matanzas, free of its cargo
San Pedro	Same place, its decks flooded
Tirry	Cayo de Viboras, its decks flooded
Poder de Dios	Same place, free of its cargo
Almiranta	Same place, its hold flooded
San Francisco	Same place, its decks flooded
Las Angustias	Same place, totally flooded
Arizon	Same place, free of part of its cargo
Sanchez de Sevilla	Same place, flooded up to its poopdeck
La Fragata de La Florida ..	Submerged, one man arrived to this Key on a piece of mast
San Ignacio de Irujio	Off Cayo de Vaca in pieces, only 12 men saved from its crew and passengers

"I'm going to put you right on something."

Once the ship was once again underway, and the mag streaming astern, I looked ahead to where he was headed. A long brown streak marred the blue-green water just a few hundred feet ahead. I glued my eyes on the recorder, with the drop buoy line held tensely in my hand. The needle was drawing a fairly smooth line, popping occasionally to one side or the other as it had done in this area the past three runs. Then it started a slow drift to the right, increasing in speed until it was pegged against the side. I waited until it made a rapid transit to the other side and released the drop buoy. Back aft, the buoy slid astern, bobbing in the ship's wake and beneath it was the same brownish streak that I had seen before.

This time we both jumped in after setting the anchor. It was the most beautiful sight I had ever seen. We both exploded to the surface with a whoop, thumping each other on the back and hollering like madmen. We hurried back to the boat to put on some scuba gear, so that we could stay down and look around. Below, mossy colored brown and green egg-shaped river rock lay in a

Various artifacts off a 1733 wreck.

mound three or four feet high and about 100 feet long. At one end, four anchors lay crisscrossed on a hard coral bottom. Several cannon lay nearby, and we didn't have to swim around the wreck more than once to realize this wreck had not been touched by salvors in modern days. A 400 pound plus jewfish lay next to the largest anchor. He seemed completely oblivious to the intrusion by these two odd beings who dashed madly about, blowing air periodically in a trail of bubbles. The whole wreck was covered with fish of all sizes and descriptions, and it was a tropical fisherman's paradise.

Over the months to come, we were to get familiar with each of these fish and to call them all by name. As I swam around, I noticed the largest barracuda that I had ever seen, lurking menacingly next to a colorful coral head; we later dubbed him Herman. The water that day we first found the wreck was clearer than at any other time I can remember. I peered to seaward through the deep blue underwater gloom — I had seen a

shape, long and dark, but it was gone now. I knew this particular channel well and I also knew that it hosted some of the biggest and nastiest hammerhead sharks ever seen. I put the bad thought out of my mind and continued my revelment over the new-found joy.

We needed a big boat to work off in order to salvage this wreck. We got together with Jeff Burke and Donald George of Rio Hondo, Texas, and hired their 60 foot shrimper the R/V Geosearch for the occasion. During the next few months, we were all busy working the wreck whenever the weather permitted. We were fastly accumulating a whole museumful of artifacts in Dick MacAllaster's backyard, but so far we had not found much in the way of coins. We had several silver cobs and a gold two escudos piece, however, the wreck just did not have the profusion of coins that I had hoped for. We did find some nice things though; a silver bell, dozens of crosses, hundreds of gemstone rosary beads, an emerald, a small jade Buddah, a large enigmatic box-shaped thing which weighed 236 pounds, some corn grinding tables (metates) with their rollers, and just literally dozens of assorted odds and ends of antiquities.

One weekend when Dick was with us and free from his duties with the State of Florida Department of Transportation, he and Jimmy were working on opposite sides of the ballast. Jimmy was carefully digging cannonballs out of the rocks and was engaged in trying to loosen a particularly stubborn one. In fact, he was so busy at this task that he scarcely noticed MacAllaster beside him. Dick motioned Jimmy to follow him around to the other side of the pile, and when he did so he came face to face with the muzzle of an eight foot cannon. The cannonball on the other side which had proved so stubborn was actually the cascabel at the breech of the cannon, and very much attached to it!

Working this wreck was unique since being on bedrock with little, or no sand around it, it required some unusual excavation techniques. We had to dig out the potholes in the bedrock systematically and a small airlift was employed while the digger handfanned the hole. In this fashion, the digger could keep the sand and silt sucked away, and observe his work as he carefully worked his way to the bottom of the hole. One day I was working on a small, but fairly deep pothole, when I noticed a small fluttering object way down on the bottom. By stretching my hand and fingers to the limit, I was able to just barely secure the object in my fingertips. I slowly retracted it and stared in disbelief at the thing in my hand. It was about the size of a fifty cent piece and had an engraved portrait of Phillip the Fifth on one side. I wasn't sure what I had at first, but then when I saw the date 1732, I knew what it was. It turned out to be a four escudos 1732 gold Portrait coin, one of the first struck on the screw-type press in the new world. Similar coins in silver, which

are much more common, bring \$3,000. on the world market today. I hastened to the boat, protectively clutching my new-found prize.

Jimmy and Larry Murphy, our State of Florida Field Agents, were there to greet me. They were duly impressed, and after we had talked about it for a while, and I had regained my breath, I went back down to try and find another one.

Then Jimmy and Larry did one of those funny things that treasure hunters do in similar situations; they planted the coin in the peanut butter jar in the galley and then screwed the cap back on the jar. They were waiting for Johnny Berrier, who was still below, to come up for lunch and to go, as he usually did, straight to the peanut butter jar. They didn't have to wait long, for soon he climbed over the side, slid out of his dripping gear, wiped off his face, and strolled forward to the galley. But instead of going to the peanut butter jar, he made up a ham sandwich.

Jimmy couldn't stand it any longer. "Why don't you have a peanut butter sandwich?" he blurted out.

"What and see that gold coin Jack found that you put there?" was Johnny's casual reply.

You could have knocked the boys over with a feather. No one to this day knows how Johnny knew about the coin. Jimmy swears he is some sort of Nostradamus reincarnated. We all figured that Jimmy's eagerness, coupled with the fact that I had found another gold coin just prior to that, had prompted Johnny's actions. Jimmy still doesn't buy this rationale, however.

While working through the ballast one particularly murky day, I spotted the base of a china cup. Since we had found hundreds of china shards prior to this, I wasn't unduly impressed. Slowly, I removed the rocks around it. The more rocks I took off, the more of the cup I could see. Pretty soon I had the whole cup exposed and lying there in the silt. I reached down in disbelief, and plucked the cup out of the mire. . . it was absolutely intact without a scratch or nick. This fragile china teacup had withstood the slamming and pounding of a hurricane, and the grinding chaos of a stricken ship coursing its way across the bottom, and complete burial under hundreds of tons of ballast. It was truly a miracle.

The 1733 Flota disaster has been a great windfall to the modern treasure hunter, and there is by no means an end to this tale, for there are other ships of that Flota to be found. Historically, treasure hunting, wrecking, or salvage has been an integral part of the culture of the people of the Florida Keys. Early Keys history is filled with the colorful accounts of this hardy free enterprising breed. This field is probably one of the last frontiers of free enterprise in America and it still provides a great challenge to the man or woman who would dare the seas and endure the numerous hardships and disappointments of this ancient and honorable trade.

2539 -There could not exist any better example of the legendary richness attached to Mexican Numismatics than this handsome 8 Escudos from the Colonial era. The rarest date of its type - a coin that typifies the legacy of Spain's Imperial Grandeur imprinted in a gold doubloon that was lost at sea and found by treasure hunters, practically intact, a quarter of a millennium later.

The obverse portrays an elaborate armored bust of Philip V wearing a long wig and surrounded by the legend "PHILIP V D G HISPAN ET IND REX 1733" (PHILIP V BY THE GRACE OF GOD, KING OF SPAIN AND THE INDIES 1733). The reverse features a coat - of - arms surrounded by the golden fleece and the legend "INITIUM SAPIENTIAE TIMOR DOMINI" (THE FEAR OF THE LORD IS THE BEGINNING OF WISDOM), amongst four rosettes the letter "M" signifying that this legendary coin was minted at the Mexico City Mint. At left center the letter "F", with rosettes top and bottom, for the assayer Francisco de la Pena, and at right center the figure "8" denoting its value (denomination).

What magic - what splendor - what a pivotal point in history! A time when the ports of the New World overflowed with plunder for the crown; a time historians would classify as the "golden age" of Spain's American Empire. A time when vessels laden with treasure, returning to Spain, would face the challenge of untold treachery from the weather, the whims of the sea and the constant threat of looting from pirates that preyed on the plate fleets.

GOLD had affected man like a fever since he first learned the power of this glistening metal. Gold, and more importantly, gold coins have continued to finance empires, wars and centuries of conquests. To this day, the struggles to salvage these engraved discs of gold continue to bring death on the high seas.

Much of the history and background relating to the salvage operations of the 1733 Plate Fleet have been mentioned in the preceding article: therefore numismatically speaking, the coin hereby offered should indeed be considered one of eminent importance and rarity - and should match or surpass any past sales record in Mexican or Latin American Numismatics.

Some of the most significant offerings of Spanish American and Republic coinage have been as follows:

- 1) Henry Christensen Auction December 6 & 7, 1974 (lot#159) Cuban 20 Pesos Gold 1716 fetched \$40,000.00
- 2) Superior Stamp & Coin Co., Inc. ANA Auction August 25, 1977 (lot#2585) Guatemala 8 Escudos 1824NG, Ceiba tree and sun above mountains, graded AU/VF \$20,000.00
- 3) Same auction as above (lot#2582) Guatemala 8 Escudos Ferdinand VI, 1750GJ, bust of Philip V graded Very Fine. \$37,000.00
- 4) Same auction as above (lot#2583) Guatemala 8 Escudos 1757GJ, graded Very Fine. \$15,000.00
- 5) Almanzar's private sale July 1977, Mexico 4 Escudos Charles II "Royal Specimen" (round) recovered from the sea, graded Almost Uncirculated \$16,500.00
- 6) Almanzar's private sale in 1976, Guatemala 16 Pesos 1863, above. \$20,000.00
- 7) Private sale (known to Almanzar's) Mexico 8 Escudos Royal Charles II, holed and repaired \$20,000.00

There may have been other sales of major rarities of which we do not have records, but to the best of our knowledge, these are amongst the highest prices paid for Latin American gold coins and the \$40,000.00 paid for the Cuban 20 Pesos 1716 is the highest price ever paid.

The collecting fraternity has often heard or read about rarity - a word that conjures and awes, and of course it presupposes intrinsic worth. A quote from the dictionary will assist us to further define the status of rarity: "something remarkable or valuable because of its scarcity". We suppose that there are other extant specimens of this date, and this is of course the reason for having listed the date in the numerous references. However, we must confess that we have not seen or have we heard of the other specimens. Perhaps every Mexican coin of high degree of rarity, that turns up, is not reaching the auction houses as was the case of the Royal 4 and 8 Escudos mentioned above. We know for sure that we had no problems in selling at least four "Hook-neck eagles" 8 Escudos 1823 in average Extra Fine condition at prices ranging between \$9,000-11,000.00 in the last few years. Beyond a coin of this type, we are of the belief

that gold rarities of Mexico such as the one offered are truly so rare that they are legends in numismatics. Surely if there are other extant specimens of this date, our 8 Escudos is probably one of the finest.

We conservatively grade it as "nearly as struck" and the only exception is that of the small areas encrusted by the sea. Otherwise it actually, believe it or not, has preserved its original luster and a consensus of the grade of the coin is About Uncirculated. In order to better appreciate the areas of the coin which are encrusted with sea salt which is very inconsequential, the collector should look at the photo on the opposite page.

To further enhance the potential of our offering, we will provide a certificate of genuineness (ANACS Num B8L5LC). Much more could be written to entice the imagination - suffice it to say, in closing, that our estimate is \$30,000-60,000.00

ACTUAL SIZE OVERSE

ACTUAL SIZE REVERSE

We are photographically endeavoring to portray our King in Numismatics so that all its beauty is vividly apparent. By showing a darker photograph on the previous page, we have highlighted its high points. We are now showing the above photograph which gives a better indication of how small and inconsequential the encrusted areas are.

Anyone wishing further information about this piece is welcome to call or make an appointment to come by our office during banking hours to view the coin in person. Bids will not be disclosed to other bidders and the name of the successful bidder will, of course, be kept confidential unless otherwise requested.

parte. La mercadería puede ser devuelta SOLAMENTE con nuestra autorización dada por escrito. Esta solicitud para retornos tiene que ser hecha dentro de 10 días después de nosotros haber despachado los lotes.

11. El derecho de propiedad sobre todos los artículos queda en poder del catalogador, hasta que sean pagados completamente. Todos los artículos son garantizados a ser auténticos (a menos que no se haya indicado lo contrario), y serán tales y como se hayan descrito. Además, el catalogador se reserva el derecho de aceptar o rechazar cualquier apuesta a su discreción.

12. Todos los lotes de esta subasta estarán disponibles para inspección mediante cita, SOLAMENTE antes del 7 de diciembre 1979.

(Fortsetzung von Seite 4)

11. Der Anspruch auf die Posten verbleibt beim Händler, bis die volle Zahlung eingetroffen ist. Alle Artikel sind garantiert echt (wenn nicht anders angegeben) & genauso wie verzeichnet. Außerdem ist dem Händler das Recht vorbehalten, Gebote nach Belieben anzunehmen oder abzuschlagen.

12. Alle Lose Können nach Vereinbarung vor 7. Dezember 1979

4 AUCTIONS SCHEDULED THROUGHOUT 1980

Eight Reales And Pesos

of the New World

Spanish American

Pillars and Portrait Coins

World Wide Crowns And Minor Coins

World Wide Paper Money

We are now accepting consignments for our 4 auctions scheduled for 1980. Accumulations as well as name collections are being accepted and special fees can be arranged for name collections. We also need numismatic material for our Fixed-Price-Lists as well as auctions. Terms of consignments are available for the asking.

ANNUAL SUBSCRIPTION FEES: Fixed-Price catalogs on coins, medals and tokens, plus a yearly book catalog \$7.00. Auction catalogs plus prices realized (four annually) \$8.00. (Attention banknote collectors: We do not plan on publishing specialized catalogs on paper money, but will continue to include substantial offerings of paper money in our auction Catalogs.) ALL OF OUR PUBLICATIONS (AT LESS THAN PRINTING AND MAILING COSTS \$12.00 Airmail on any or all of the above to U.S. addresses, U.S. possessions, APO's and FPO's (not recommended to addresses in continental U.S.) \$5.00 and airmail on any or all of the publications to foreign addresses \$8.00.
